WHAT IS DIGICHAIN?

Digichain is a cryptocurrency token that was already conceptualize since March 2021, Digichain team are very optimist that Digichain will be the future of cryptocurrency, Digichain provides various offerings and solutions to problems that usually are overlooked by others, it planned as the goals of Digichain are to be the future of cryptocurrency, to prove that Digichain will execute the goals, there are some plan that are planned to build Digichain way into becoming the future of cryptocurrency, such as creating its own Blockchain Network called DIGISMARTCHAIN, DIGICHAIN Presale Platforms, Live Chart, DIGI Multichain Wallet, DIGIDEX (A decentralized swap platform), DIGITOOLS (A token generator platform), and DIGILAUNCHPAD, etc.

Digichain team consist of five people who are responsible for the sustainability of the project, for the development of its usecase, the team consist of IT (4 people) who have their own respective job desks such as, cryptography developers, UI/UX developers, backend developers, and our frontend developers.

DIGICHAIN USECASE

DIGICHAIN WALLET

Digichain Wallet is created with the latest technology available, Digichain Wallet is a multichain wallet that has four network being established (Binance, Ethereum, Solana & Matic), Digichain team ascertain deficiency on some aspect in others wallet such as slow transaction speed time, feature that do not appear equally on iOS and Android, this problem will bother users if its being unconcerned, fortunately Digichain Wallet discover a solution for the problem, resulting in Digichain Wallet obtaining an advantage over Digichain Competitor, the advantage that Digichain Wallet has are, equals feature available on both iOS and Android, low transaction fee, and faster transaction time.

SMART LAUNCHPAD

Digichain Launchpad is a platform that work as a Token Creator platforms, it has a number of segment in the platform, such as **Standard Token**, **Reward Token**, and **Liquidity Generator Token**, some advantage that Digichain Launchpad has are Anti-Bots system that can be activated & deactivated manually, Liquidity Locker Provider, and airdrop system.

SMART LAUNCHPAD

Another feature that also included in Digichain Launchpad are Digichain presale platforms, Digichain Presale Platforms is a platform that allow crypto projects to offer their token at a certain price to an interested parties, since the rise of bitcoin, cryptocurrency is increasingly recognized by many people in the world, resulting on many new coin being born, Digichain Presale Platforms allowing this new born project to raise funds for the development of the project, in return giving benefit for investor, this activity could be beneficial for both development team, and investor.

The development of many others presale platform is a result of this cryptocurrency technology soar, to be at the top of the competition, Digichain Presale Platforms has some advantage to offer, such as KYC facilities, and created using strong cryptography to secure the financial transaction happened in the system.

DIGIDEX

Digidex is a decentralized (swap) platform that allows users to do direct peer-to-peer (P2P) cryptocurrency transaction, it execute trades between users wallets, user also remains in control of each private keys when doing transaction on Digidex platform, some feature that Digidex Platform offer are Swap, Staking, Farming, and Liquidity Adder feature, this is done inductively to provide user the best experience while using Digidex platforms.

DIGIMARKETCAP

DigiMarketCap is a platform that provides information about cryptocurrency rankings, and charts. Users can also do price-tracking for cryptoassets in the cryptocurrency world.

the advantage DigiMarketCap has over others are, very high selection of token that will be listed in the marketcap, DigiMarketCap are selecting base on quality of the token project, and the quality of the developer team, this action is done to minimize the loss of users or potential users, caused by a not responsible token that do "rug pull" or "scam", therefore by doing this DigiMarketCap will have a trustworthy reputation, and attract more potential user.

DIGICHAIN EXCHANGE

Digichain Exchange is an online cryptocurrency marketplace platform, it also allow users to buy, trade, and sell cryptocurrency or digital currencies, users can deposit their fiat currency, then use those currency to purchase digital currencies that available in Digichain exchange. As the bitcoin price has become increasingly expensive, investor are searching for project that has potential, Digichain Exchange provide this list of choice and trustworthiness for investor to use, the advantage Digichain Exchange has over others exchange are :

1. **LOW TRANSACTION FEE**
   One of the problem that are overlooked by other Cryptocurrency Exchange are High Transaction fee, users may not feel disturbed if they trade with a small fund, but when users trade with a big amount of fund, it will start to disturb them. Fortunately Digichain Exchange set out to provide a solution for it, by creating an exchange with much lower fee than others exchange out there.

DIGICHAIN EXCHANGE

2. High Security System
   Digichain Exchange are designed using unique and strong cryptography, it is done to highly secure any transaction, or any action taken by user in the platforms, it also done to strengthen the trust of users over the platform.

BLOCKCHAIN

Another feature that also included in Digichain Launchpad are Digichain presale platforms, Digichain Presale Platforms is a platform that allow crypto projects to offer their token at a certain price to an interested parties, since the rise of bitcoin, cryptocurrency is increasingly recognized by many people in the world, resulting on many new coin being born, Digichain Presale Platforms allowing this new born project to raise funds for the development of the project, in return giving benefit for investor, this activity could be beneficial for both development team, and investor.

The development of many others presale platform is a result of this cryptocurrency technology soar, to be at the top of the competition, Digichain Presale Platforms has some advantage to offer, such as KYC facilities, and created using strong cryptography to secure the financial transaction happened in the system.

PROJECT ROADMAP

PHASE 1

- Build Community
- IDO Launch
- First DEX & CEX Listing
- Wallet Launch

PHASE 2

- More CEX Listing
- Smart Launchpad
- Massive Marketing
- Build Community

PHASE 3

- Build Community
- Tier 2 CEX Listing
- DIGIDEX Launching
- Blockchain Development

## PHASE 4

- Tier 1 CEX Listing
- Blockchain Launching
- Exchange Development
- DigiMarketCap Development
- More incoming...
